Freelance · Open to remote work (UTC+3) and to relocation abroad

SUMMARY

Odoo functional and technical consultant. At KASIA Consulting, I supported small and mid-sized businesses in very different sectors (phone retail, consulting, sea freight) from scoping to post go-live support: Odoo Community and Enterprise configuration, data imports, acceptance testing, user training, and custom module development in Python, XML, QWeb and OWL. I notably developed two Odoo modules for Mobile Money payments at the till. My full stack developer background (.NET, Java, React) and two years in information system compliance at Webhelp round out this profile.

TECHNICAL SKILLS

Odoo apps: Sales, Purchase, multi-warehouse Inventory, Point of Sale, Invoicing, Accounting, Employees, Payroll, Expenses, Studio

Functional: scoping workshops, configuration, data imports and consistency checks, acceptance testing, user support, training, procedure writing

Odoo technical: Python, XML, QWeb, OWL, Odoo ORM, automated tests, PostgreSQL (SQL)

Development: C#/.NET, Java/Spring Boot, React/TypeScript, PHP, JavaScript

Tools: Git, GitHub Actions, Docker, Linux, Jira

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer — Self-employed (sole proprietorship)

10/2026 – Present · Remote · clients in France

- Harrys Studio (nail salon, Lagny-sur-Marne, France): designed and built the entire website, with online booking (availability calendar, choice of time slot and technician), services, gallery, customer reviews, login area and legal pages (React, Vite, Supabase).
- Agentova.ai (French SaaS company providing AI agents for small businesses): rebuilt the entire marketing website and moved its design from a dark to a light theme (Webflow).
- Delivered fully remote engagements: requirements gathering, development, go-live and ongoing updates.

Odoo Developer and Business Analyst — KASIA Consulting

06/2026 – 09/2026 · Antananarivo, Madagascar · Permanent contract

- Functional scoping and requirements analysis with clients: workshops, meeting minutes, clarification questions.
- Odoo configuration (Community and Enterprise): sales, purchase, multi-warehouse inventory, point of sale, invoicing, accounting, employees, payroll, expenses.
- Data imports (products, stock, purchase orders) and consistency checks before validation.
- Internal then client acceptance testing before every go-live; user support and issue follow-up through to resolution.
- User training (purchase, sales) and step-by-step procedure writing.
- Custom module development when the standard isn't enough: Python, XML, QWeb, OWL.

Full Stack Developer — OPTIMADA

09/2025 – 05/2026 · Antananarivo, Madagascar

- Maintained and evolved RADIAN, an HR application used by client companies of 300 to 2,000 employees (C#/.NET, React, TypeScript, SQL Server).
- Designed and built a customer portal in Java Spring Boot and React, synchronized with Sage 100cloud CRM.
- Worked across the full development lifecycle (analysis, design, development, testing, deployment), tracking tasks in Jira.

Logs Administrator — Client Point of Contact — Webhelp Madagascar (Concentrix group)

08/2022 – 08/2024 · Antananarivo, Madagascar

- Audited user accounts, permissions and information system access for about 500 employees.
- Trained employees on IT security policies, operational risks and compliance requirements.
- Represented the IT team in 2 consecutive annual client audits, both passed, notably on the technical side.

Customer Advisor — Technical Support — Webhelp Madagascar (Concentrix group)
12/2020 – 08/2022 · Antananarivo, Madagascar

- Diagnosed and resolved customers' technical and IT issues.

IT Manager — Phénix Madagascar
02/2020 – 09/2020 · Antananarivo, Madagascar

- Developed a web application for staff management.
- Administered the company's CRM applications and handled IT maintenance.

ODOO PROJECTS

- **Mobile Money payments at the till:** Odoo, Python, OWL, QWeb — transaction reference at the till (works offline), duplicate detection, operator statement import (CSV, XLSX, XLS), automatic reconciliation and control report.
- **Inventory and POS for a phone retailer:** per-device IMEI tracking from purchase to sale, shop-to-shop transfers by scan, till checks, detailed invoices and margin per shop.
- **Invoicing, HR and payroll for a consulting firm:** invoices in ariary with a task appendix, Malagasy payroll (CNAPS, OSTIE, IRSA), final settlement, enriched general ledger.
- **Business application for a sea freight forwarder:** LCL and FCL consolidation files taken over from an Excel workbook, package release prorated to payment, margin per file.
